## Company Profile and Development History

Haiba Sanitary Ware Co., Ltd. locates in the Rulan City, the hinterland of Wenzhou, Zhejiang, China. Rulan, locating in the middle part of China's Golden Coastal Line, is the major modern industrial and trading city with rich historic culture and is the southern center city of Wenzhou City Group. In addition, it's known as the member of China Excellent Tourism Cities. Rulan has outstanding geographic conditions and ideal investment environment. With the connection of 104 State Express Way to the Shenyang-Shanghai Express Way Network and the short distance to Wenzhou Airport, it has rich land and water transportation.

The Haiba Company was first established in 1993 and is a Pioneering joint stock enterprise professionally engaging in developing, designing, manufacturing and sales of sanitary wares. In recent years, the company, based on its consecutively innovating operation idea, professional marketing team and reliable business reputation, with the help of domestic and international sanitary ware brands, establishes its own customer network and enjoys the industrially leading marketing ability. The company, with the help of rich management experience, outstanding marketing ability and professional manufacturing ability, on the basis of profession, diligence, creditability and win-win spirit, aims to promote company positioning of pioneering cost, pioneering product and pioneering service, and would like to cooperate with all colleagues in sanitary ware industry to make remarkable contribution to the development of sanitary industry.

Haiba Company also possesses the internationally first-rated manufacturing technique, artwork developing competence and advanced equipment. Besides, Haiba has the globally first-rated production lines and globally leading intelligent automatic testing center equipped with the internationally first-rated testing devices, such as material spectrum analyzer, Salt spraying tester, product life tester and flow testing machine.

The water tap from Haiba has fashionable design, refined artwork and outstanding quality advantages. In addition, the company is able to provide water taps of over a thousand specifications to meet requirements of different markets. Products from Haiba enjoy good sales in over 120 countries and regions. Haiba, as the internationally leading water tap system supplier, has formed the OEM customization-oriented product developing patent and enjoys huge popularity among both domestic and international customers.

Haiba has passed the ISO9001 International Quality System Certificate, European CE, British WRAS, French ACS, German DVGW, Danish ETA, Turkey TSE and BSCI certificate. Meanwhile, the company is awarded as Wenzhou Municipal Major Enterprise, Top 10 Exportation Enterprises, Four Star Enterprise and Top 100 Enterprise of Longwan District. In addition, the company is awarded to be the AAA Creditable Enterprise of AOC Zhejiang Branch, while the Haiba Trademark is awarded to be the Famous Zhejiang Brands and Haiba's products are awarded to be the Famous Sanitary Branded products. These certificates and honors witnessed Haiba's power and potential.

The rich labor resource is the unique resource advantage of Haiba. With the increase of production cost in advanced countries and the moving-out of production center, the domestically famous Haiba Company shall enjoy better potential in the field of production. Therefore, Haiba has made strategic decision, after taking its own production capacity as well as international and domestic industrial resource into consideration under the circumstance of current market economy system and socialized large scale production, to cooperate with German XX Company, for the sake of forming an industrial cooperation relationship between technology possessor and manufacturer as well as win-win cooperation relationship.

The German XX Group is a large international service-oriented sanitary ware corporation with remarkable technical power and outstanding quality. It's the internationally leading company in the aspect of water tap technical service, brand output, brand planning and brand promotion. Meanwhile, German XX Group possesses professional technical team and management team. The cooperation between Haiba Company and German XX Group will open a new page for the sanitary industry.

The outstanding feature for the cooperation between Haiba and German XX Group is to separate brand and production. The manufacturer focuses on manufacturing while the brand holder could be freed from sophisticate production affairs and focuses on brand output, brand technical support, brand promotion and brand service. In addition, it's an important step for Haiba to get into international sanitary ware industrial chain by making use of German XX Group's high quality product to build its brand image, so as to become the competitive manufacturer in the international sanitary ware industrial chain.

The Haiba crew, by sticking to the enterprise spirit of honesty, dedication, harmony, innovation and excellence, insisting on the development strategy of integrating into international market by cooperation, building brand with outstanding quality and adopting market to promote development and advocating the enterprise culture of humanity, aims to develop Haiba into a famous enterprise with scientific management, scaled production and international management.

The sea owes its increasing capacity to its admittance of the accession of various rivers.  
Haiba owes its support to the fulfillment of your dreams.

# European famous designers assume the task of design

Latres

The former British Prime Minister Margaret Thatcher had said, "Britain can live with no prime minister, but can't without a designer." This sentence had illustrated the importance of designers to an enterprise and even to a nation. We cooperate with European famous designer to create original design for sanitary products. Paul Walker, born in a small town in Britain, and once studied at the central Saint Martin College of art and design in London Covent Garden, is now engaged in single product design in sanitary ware industry after graduated from the college and returned back to the country. He believes that: Design is paradise of freedom, which truly changing the way we live.

Artistic Quality Achieved by the design

Extraordinary imagination and creativity is the determination of talented designer. In this industry, no one can accomplish at one stroke, and not only the hard work and sweat can achieve success. The designers need more free inspirations to design the artistic quality which can achieve success of products, and create the life style to bring back freedom! Our designers combine this freedom with relaxed and natural decorative design style of the sanitary products, restoring the natural property of the products and make the beauty of nature fashionable in the world.

# Full automatic polishing treatment

Introduction of equipment with foreign advanced technology: fully automatic polishing machine. It is mainly used for surface polishing treatment on sanitary ware, vehicle components, construction hardware industry, and etc. It is a kind of full automatic polishing equipment with mechanical and electrical integration, which is artificial intelligent operated, full automatically controlled, over-programmed, and can complete various assignments in three-dimensional space. After the automatic polishing treatment, our sanitary products will be as bright and silky as mirror with no trace of water to achieve perfect combination of quality and aesthetics. At the same time, the problems of polishing effects which could not be achieved by vibration polishing, chemical polishing, and manual polishing in the past can be totally solved.

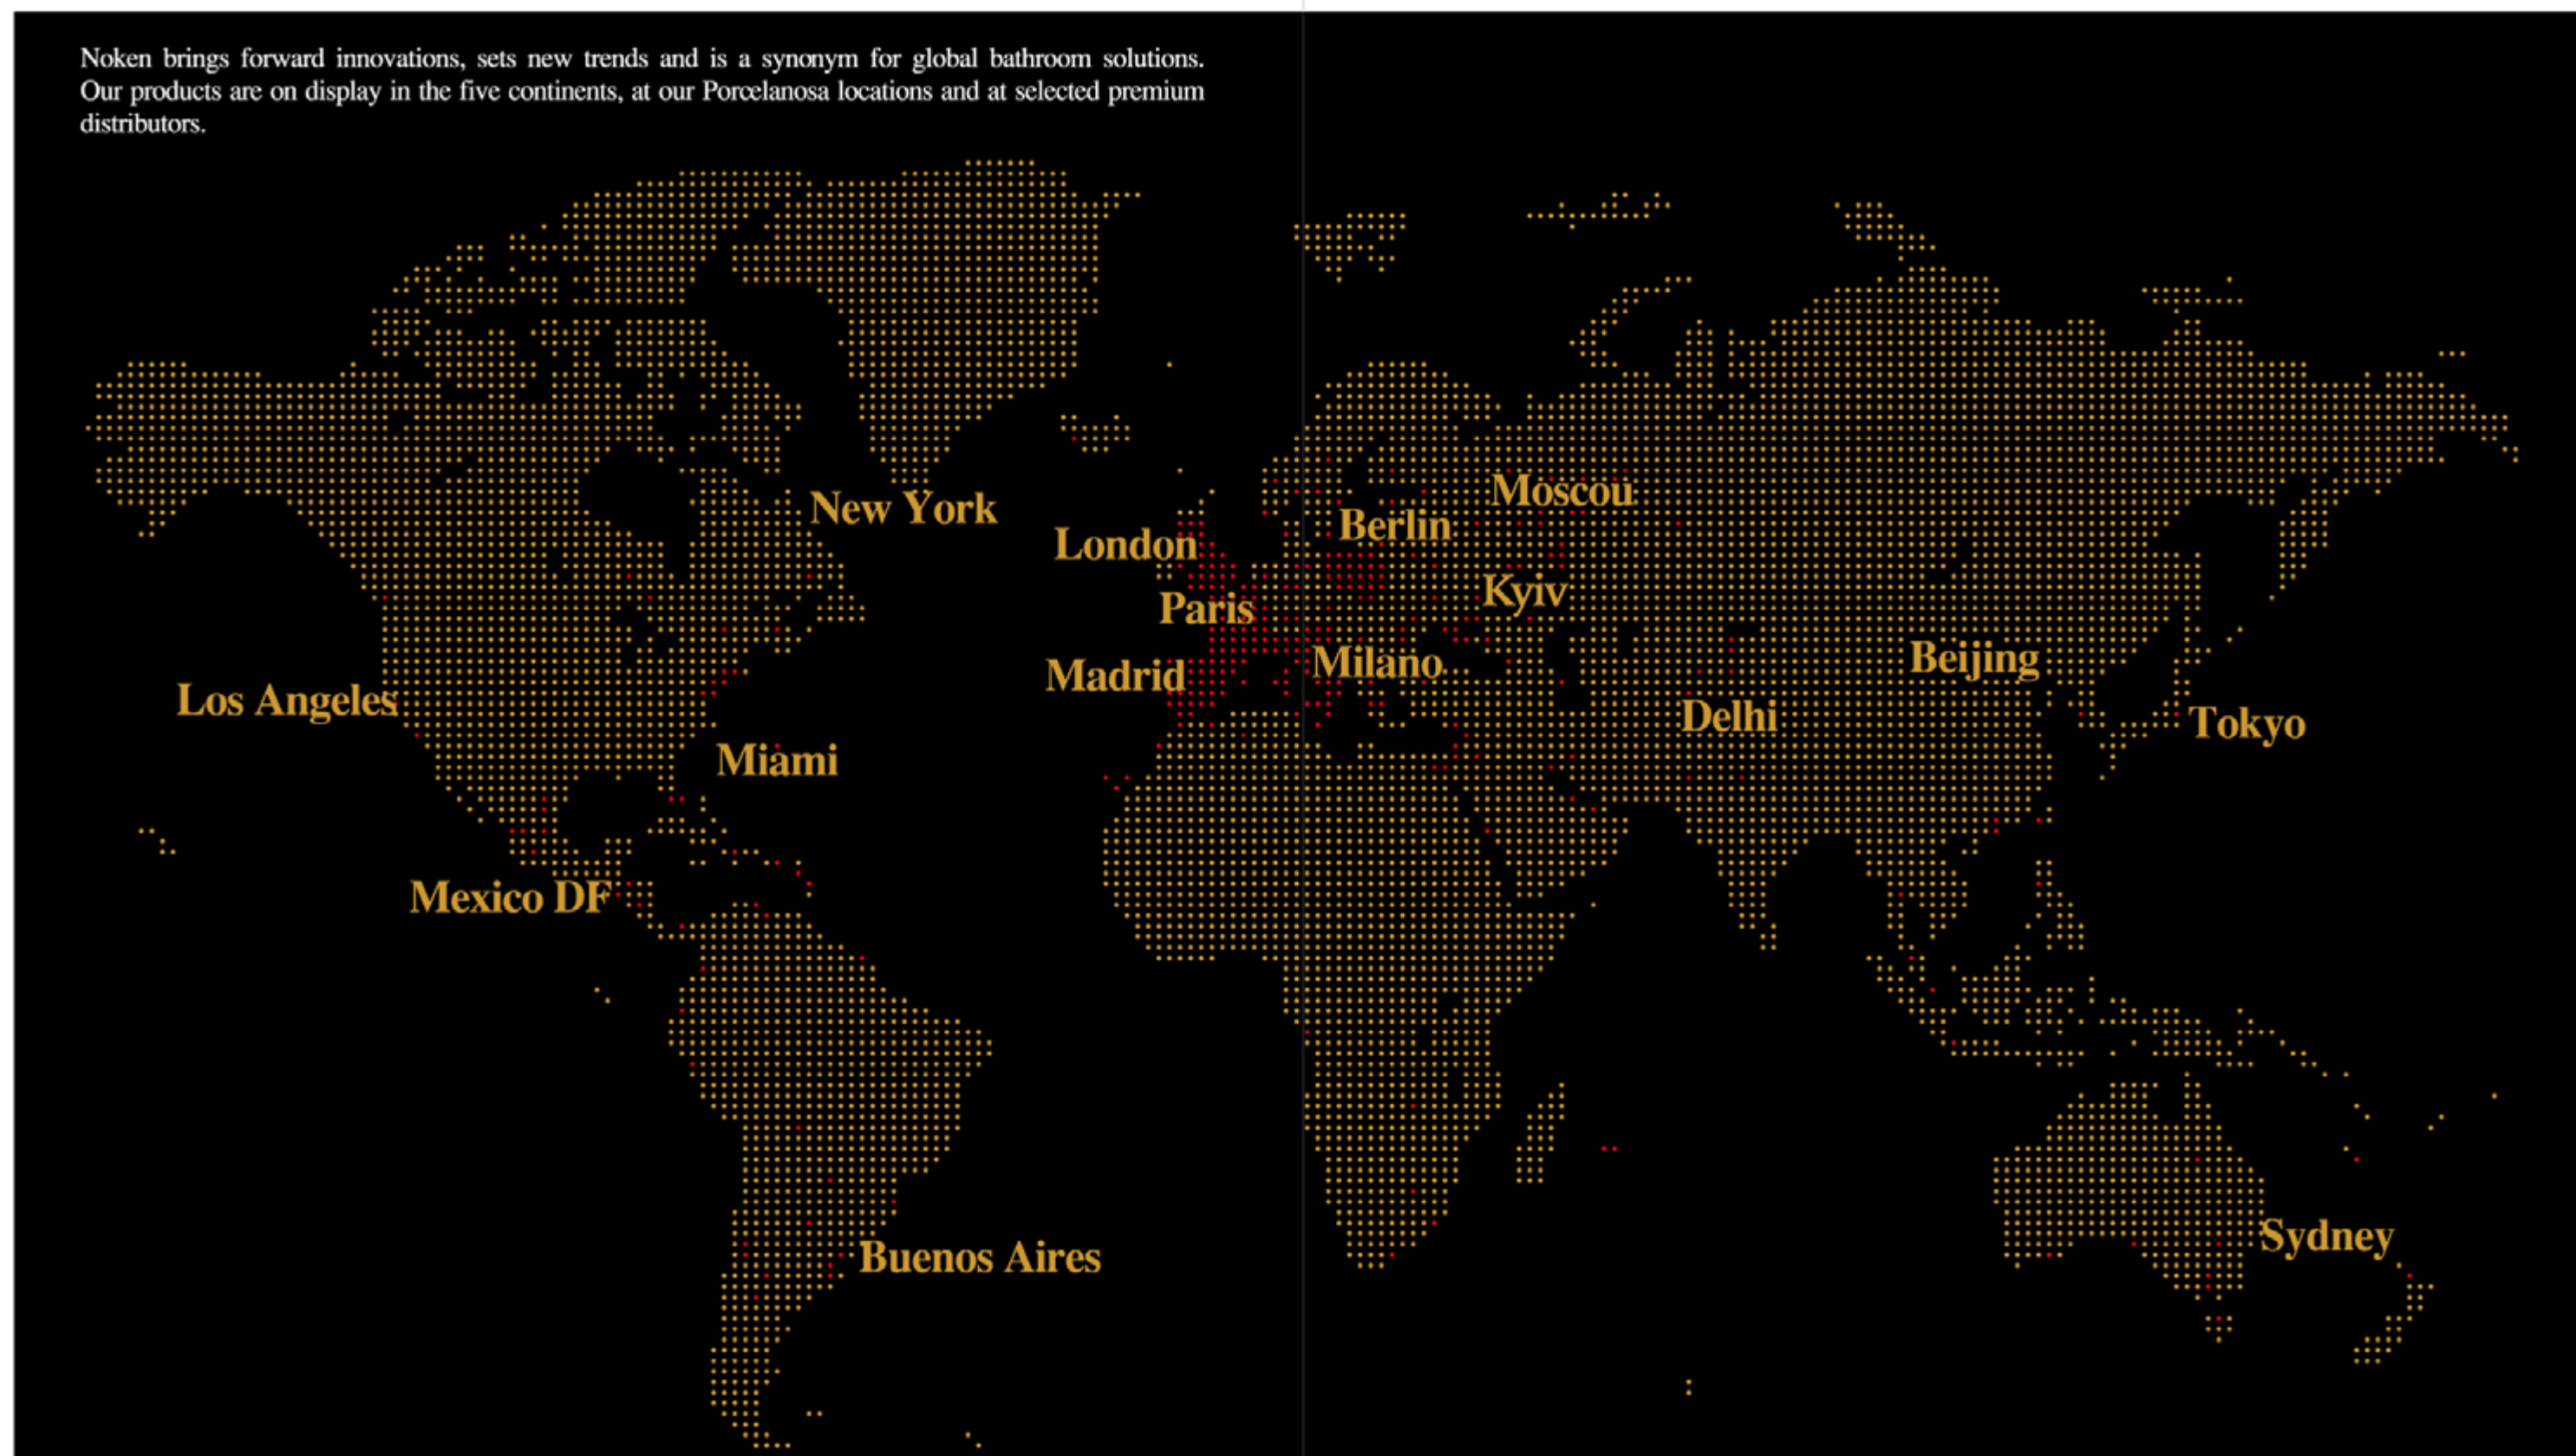

The surface brilliant polish for deburring, deflash, chamfering and rounding, derusting, descaling, and removal of grain-adding traces is to solve the problems for polishing on the thin arms, narrow slits, and slice components which are of complex shapes, cannot be machined on the grinder because of extra small, thin and ductile features and cannot bear larger mechanical pressure. The original size accuracy, shape accuracy and position accuracy of the products can be kept the same or improved, which plays the function of beautifying. After full automatic fine polishing, the products are as bright as mirror for clear identification of shadow, and the appearance and hand feel have already reached or exceeded the level of similar foreign products, showing the unique polishing effects.

# All around the world

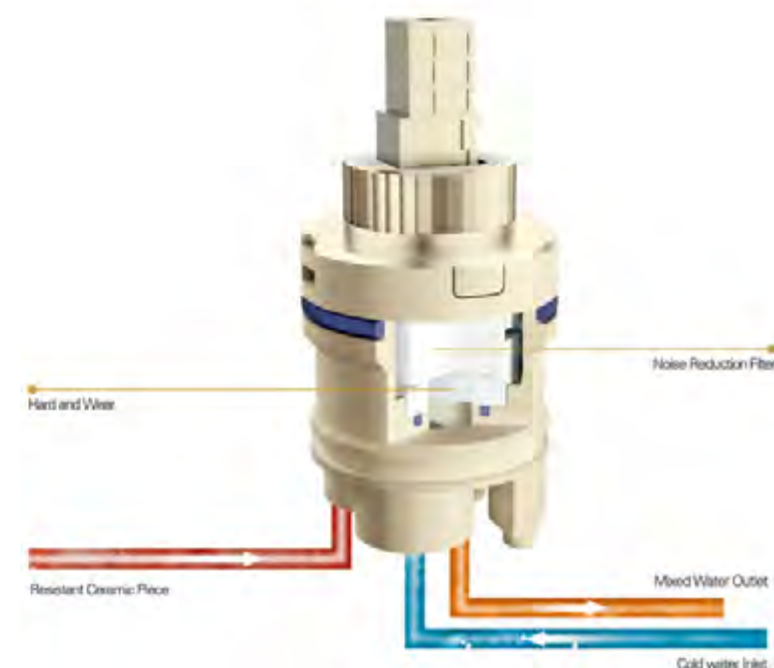

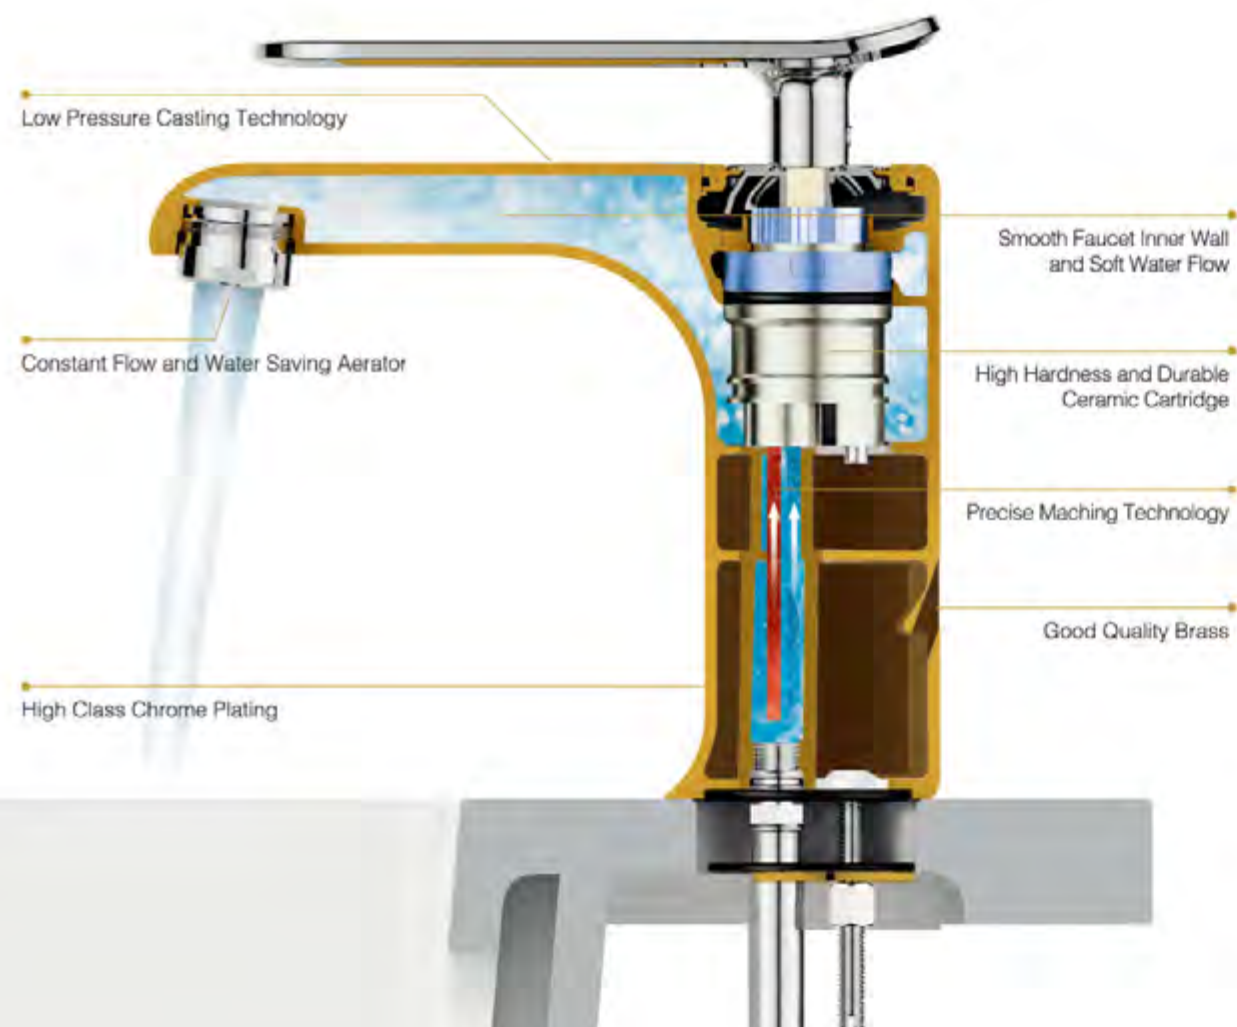

Noken brings forward innovations, sets new trends and is a synonym for global bathroom solutions. Our products are on display in the five continents, at our Porcelanosa locations and at selected premium distributors.

# Faucet With Constant Flow And Water Saving Function

**Latres**

## GOOD QUALITY BRASS

Good quality brass material ensures perfect chrome plating surface.

## PRECISE CONNECTING

Smooth faucet inner wall and soft water flow.

## MIRROR CHROME PLATING

High class chrome plating technology makes our faucet surface bright and sharp. With the merit of anti-acid, anti-oxidant and strong adsorption, after long time using, the faucet surface is still lustrous and shining.

## CONSTANT FLOW

Constant flow and water saving aerator provides plentiful bubble and a comfortable bathing.

## LOW PRESSURE CASTING

Low pressure casting technology

# DESIGN SANITATION ENJOYMENT

Combination of square and round style. The square element takes the man-machine safety chamfer into account; Using built-in bubbler; square faucets are flat, but without losing proportion; The circular body style complies standard coverage plate holes (diameter 50); all the cambered surfaces are through beautiful proportion design and consistent process requirements.

## DOVER DESIGN ELEMENTS.

Combination of square and round style. The square element takes the man-machine safety chamfer into account; Using built-in bubbler; square faucets are flat, but without losing proportion; The circular body style complies standard coverage plate holes (diameter 50); all the cambered surfaces are through beautiful proportion design and consistent process requirements.

### CARTRIDGE

Haiba faucet is equipped with Spanish cartridge. It can be operated easily and flexibly with fluent and soft outlet water even after 1 million times (300,000 times as the National Standard) of on-off fatigue test. The filter screen inside the cartridge can effectively filter the impurities and reduce the noise arising from water impulsion.

### AERATOR

Haiba faucet is equipped with environment friendly bubbler to make the outlet water fluent and soft and to prevent the splash of water. It is collapsible for the convenience of filter cleaning of the household.

## ALASKA

SINGLE LEVER

# CREATIVITY AND NEW TREND

With the neutral disposal of the color, it shows logos as well as connotation; the collision between the bodies seem to be simple, yet since the edges and corners of the body draw back intentionally, the so called responding design is made, to show the fashion charm of the sanitary ware.

The overall design was inspired from the graceful bearing of fashion show models, trendy but not bizarre. Undulant lines and curves reflect the charming stance of T-stage models; Its contraction and lucidity is the soundless declaration of fashionable style, which touches the bottom of your heart.

It is eager for Haiba to satisfy the customers needs from different cultural background; it is requested for Haiba to demand all stuff to provide best customer service and pursue endlessly the perfect; it is believed for Haiba that progress has no end.

RETRO

## TO TASTE BEAUTY, WINE AND LIFE

If life is regarded as a sort of beauty of taste, the really enjoyable beauty will be spiritually. The spiritual beauty may come from our subconsciousness or narcissism. It is unique and permanent.
